## Why Project Management?

In the fast-paced global economy we live in today, there’s more pressure than ever on business professionals to learn and understand the best practices of Project Management. As more companies strategically align themselves to utilize the principles of Project Management in their daily activities, there’s now additional focus on having knowledgeable project management professionals in the workplace.

With 87.6 million estimated jobs in the project management field by 2027 (Job Growth and Talent Gap 201-2027, PMI), Project Management is trending to become one of the most sought-after career paths in the world. Whether you’re a seasoned project practitioner focused on advancing your career or looking to acquire skills necessary to be successful in the future, our certificate will help you stand out from the crowd.

The Project Management Certificate is taught by a PMP® certified professional and will get you ready for the real-world applications of Project Management. Our program offers the trainings necessary to provide an incredible groundwork for a career in one of the fastest growing job fields in the world.

## Possible Project Management Career Paths

Project managers continue to be in high demand, with a [projected increase of 7%](#) over the next eight years which is faster than the average of all other industries.

### PROJECT MANAGER

Project managers, also known as PMs, are responsible for the coordination and oversight of the entire process of a project, from start to finish. Project managers can be found in almost every industry.

### PROGRAM MANAGER

Often coordinating tasks between multiple projects, program managers are concerned with project delegation and collaboration for the variety of teams that can be found across an organization.

### OPERATIONS MANAGER

Operations managers ensure that an organization's operations are running efficiently, effectively, and smoothly at every level in order to maximize long-term efficiency and profitability.

### SYSTEMS PROJECT MANAGER

Familiar with large-scale business operating systems and computer systems, systems project managers organize all aspects of high-value networking projects and have a role in planning, designing, and executing those projects.
